

BBSRC UK Veterinary Vaccinology Network Workshops 2015

VETERINARY
VACCINOLOGY
NETWORK

Bioinformatics Workshop

26th October 2015

The Roslin Institute

- Applying bioinformatics to Veterinary vaccinology research
- Two day meeting
- Over 50 attendees from UK and USA organisations
- Aims:
 - Understand current research
 - Resources available
 - Highlight gaps
 - Future research priorities

Thanks to Dr John Hammond, Dr Tim Connelley, Professor Cynthia Baldwin and Professor Ivan Morrison for producing the agenda for the conference

Career Development Workshop

27th October 2015

- The Moredun Institute
- 19 Delegates
- How to write a grant
 - Advice from Panel A
BBSRC committee
 - Funders: BBSRC and The Wellcome Trust
- Field Veterinarian – using vaccines in the field
- Speed Networking!

Thanks to Professor Gary Entrican for co-hosting the workshop

Antigen Discovery and Proteomics of Host Response Workshop

18th November 2015

University of Liverpool

- Tour of the Centre for Proteomic Research and Centre for Genomic Research
- Parasite vaccine antigen discovery
- High resolution approaches – Ebola outbreak
- Tools used in proteome analysis:
 - SILAC approach
 - Cloud-based Galaxy system

Thanks to Professor Rob Beynon for co-hosting the workshop

Antigen Discovery and Proteomics of Host Response Workshop

18th November 2015

University of Liverpool

Dragon's Den

Cosmin Chintoan-Uta, The Roslin Institute
Histomonas in Turkeys and Chickens, analysing
the outer membrane for surface targets to
identify prime candidates for vaccine
development

European Veterinary Vaccinology Workshop 2016

In collaboration with H2020 SAPHIR and PARAGONE

May 9th 2016 – May 10th 2016

HetPand, Ghent, Belgium

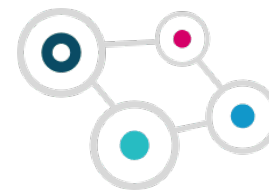

Registration before January 31st 2016 : <http://goo.gl/forms/GYx3WujyEI>

Vetvacnet.ac.uk

SEMINARS and BRAIN STORMING on Veterinary Vaccine Challenges

Themes	Speakers
Development of veterinary vaccines : gaps and requirements, market needs, regulatory constraints	Catherine Charreyre, Merial, France
The reality of vaccine use in the field and the socio-economic aspects of using vaccines	Jonathan Rushton, Royal Veterinary College, UK. Gareth Enticott, Cardiff University, UK.
New technologies in veterinary vaccine development : reverse vaccinology, vector vaccines, DIVA vaccines	Mike Francis, MSD-Animal Health
Innate immunity in livestock and adjuvants	Danny Goovaerts, Belgium
Challenges of developing effective vaccines for multicellular parasites	Jacqui Matthews, Moredun Institute, UK
Markers of vaccine efficacy, immunomonitoring, the use of 'omics' in vet vaccinology	Artur Summerfield, EDI-IVI, Switzerland
